

Hon. Dr. Varghese Moolan
Trade Commissioner,
India-Commonwealth Trade Council.

As the theories of Quantum entanglement, and neuroscience have thoroughly revolutionized the conventional scientific and universal concepts, a new angular perspective, to explain the universal orders has become inevitable and hence, I am presenting this paper on "Dimensional Progressive Theory," "Dimensional Curvature" and "Cosmic Cycle" before the rational world for their perusal and perspective redirections...Where as the classical science deals with the visual world, the Quantum Mechanics, Neuroscience, Meta Physics refers to the truths beyond sensory perception insinuating the basic Conscious waves. The void-unobservable universe is the basic cause of all observable multi-verses. The gradual progress of matter took to the forms of particles then to atoms, elements, molecules, hydrocarbons, amino acids, RNA, DNA and single cell Prokaryotes and eukaryotes. There comes the biological evolution of Darwin, which culminates in the Homo sapiens. The conscious causes the biological evolution, the living entities evolve thru the Dimensions of 1st, 2nd, 3rd, 4th etc. and finally elevates to the 10th dimension which again merges with the zero dimension and whole cosmic process repeats and reiterates.. This process of the 10th dimension merging with the zero dimension may be named as "DIMENSIONAL CURVATURE", like a snake swallowing itself from the tail onwards. The image of a snake eating its tail, known as "Ouroboros Symbol," is historically, spiritually, and metaphysically significant as a symbol of eternity and progressively repeating cycles. Even though the serpent devours itself, it simultaneously regenerates, making its self-consumption and self-regeneration eternal.

Dimensional Progressive Theory Dimensional Curvature
